

### UE System 1 Finger Signs

Finger post with a totem panel

Finger post with light weight information panel

### TECHNICAL INFORMATION

A flexible finger sign that can be adapted to meet the needs of the client and the environment. Suitable for internal and external locations.

The posts are made from aluminium with an anodised or painted finish. The finger signs and information panels can be made from either aluminium or a durable composite panel, suitable for coastal locations.

Finger sign dimensions are 100mm by 800mm. Flange plate fixing 200mm below ground level.

#### Options

Project specific solutions.  
High visibility sight line strips on the post.  
Finger sign and information panels can be made in various materials including glass, vitreous enamel and stainless steel.

The post can accommodate standard bus stop flags to maintain continuity within the project design.
