

Finger post

150mm diameter aluminium post

Anodised or painted aluminium fingers

Interchangeable fingers

Optional light weight promotional panels

Finger Post

150mm dia aluminium post can be anodised or painted, with painted aluminium fingers and stainless steel top cap.

Optional extras

- Side LED strips
- Light weight event panels
- Side contrast strips for partially sighted
- Custom finials

Wall mounted Information panel and post mounted lectern

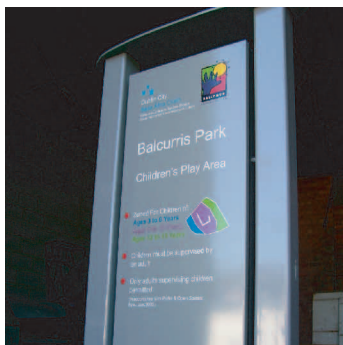

Wall mounted information panel

A1 stainless steel frame with durable enamel panels.

Post mounted lectern

Anodised aluminium legs and spigot mounted information panel enables a replacement panel to be introduced without digging out the posts. The panel itself is made from stainless steel and a durable enamel panel.

Monolith and post mounted interpretation panels

Monoliths

Can be fabricated in steel and then clad with enamel panels, or made in steel and clad in toughened glass, applying reverse vinyl graphics onto the glass.

Post mounted interpretation panels

The posts are made from anodised or painted aluminium with vinyl banners or rigid information panels. The size and material of the panel can be to the client's requirements.
